HIRAOKA → IKOMA

6.89 miles · 11.09 km

Ascent ~860 m · Descent ~770 m (DEM estimate)

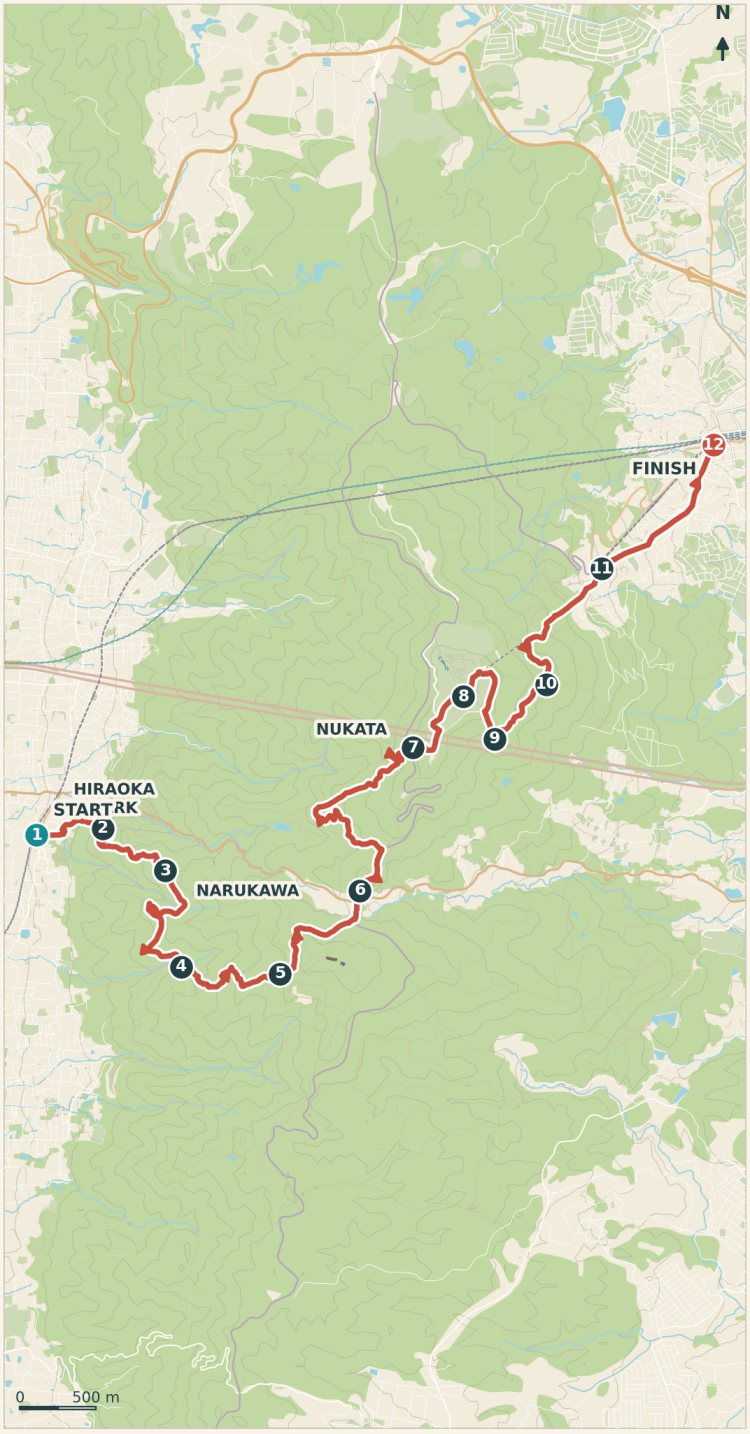

V1 / FOREST TRAVERSE

Allow about 4½–5½ hours

Steep paths / steps · Summit gate check

MOUNTAIN ROUTE MAP

North up · 50 m contours · Dashed link closed

THE WALK

Climb Hiraoka Park's wooded Kamitsudake trail. Continue through the Seseragi valley and Hatateyama forest ridge, then turn north through Narukawa and the southern Nukata trails. Use pedestrian Tunnel 2 beneath the Skyline.

Pass the summit vicinity and follow the official eastern forest detour near the former Kakurinji site. Continue past Hozanji's approach, then descend stone and town steps to Ikoma. No attraction or temple stop is required.

Restrictions: Bokura / Rest House visit omitted; barricaded link excluded. Never enter the Skyline. Summit hiking gates must be open: confirm access for your date, including Thursday / winter closures.

CHECKPOINT		MILES
1	**Hiraoka Station (east side)**	**0.00**
2	Hiraoka Park forest entry	**0.36**
3	Kamitsudake trail corridor	**0.86**
4	Seseragi woodland valley	**1.67**
5	Hatateyama forest ridge	**2.28**
6	Kuragari ridge connection	**2.92**
7	Nukata south / Tunnel 2	**4.23**
8	Mount Ikoma summit vicinity	**4.63**
9	Eastern forest detour	**5.10**
10	Kasumigaoka forest trail	**5.44**
11	Hozanji approach	**6.17**
12	**Ikoma Station (south side)**	**6.89**

Cumulative miles from Hiraoka station approach.

Estimated mix: 62% forest paths / tracks; 34% developed / approach; 4% other. Woodland cover 74%.

Exact paving is uncertain: most OSM surface tags are absent.

TRANSIT FROM / TO MORINOMIYA

OUT: JR Osaka Loop Line toward Tsuruhashi / Tennoji to Tsuruhashi; change to a Kintetsu Nara Line eastbound LOCAL for Hiraoka (A14).

BACK: Ikoma (C27), Keihanna / Chuo Line through train toward Yumeshima; alight at Morinomiya (C19). No transfer on a through train.

OSM track and official notices checked 05 Nov 2026; not field-surveyed. Recheck closures, gates and hornet warnings.

Elevation: GSI DEM10B, 10 m sampling / 50 m smoothing; estimated gain/loss. GPX elevations use this same model.
